

AI Tools & Prompt History

Project: Sleepyhead.me (PS2-Themed Portfolio)

Author: Sazidul Karim Saa'd

AI Tool Used: Google Antigravity (Gemini)

Live Site: <https://sleepyhead.me/>

Repository: <https://github.com/Saad0110meh/Sleepyhead-website>

PROMPTS SENT DURING DEVELOPMENT

1. **Initial Setup & PS2 BIOS Aesthetic**

"Create a personal portfolio website with an authentic PS2 BIOS aesthetic: startup boot video, floating pillars intro screen, and 3D orbiting stars on HTML5 canvas."

2. **Memory Card Browser & Portfolio Modules**

"Build the PS2 Browser menu with interactive memory cards that open popup modals for my Projects, QA Engineer experience, Tech Skills, and About lore."

3. **Authentic PS2 Sound Effects**

"Hook up authentic PS2 SCPH-10000 sound effects: play sound 22 when entering a module and sound 29 when closing or backing out."

4. **Interactive 2D Mini-Game Engine**

"Embed a playable 2D top-down mini-game with player sprite movement (WASD/Arrows), smooth camera follow, and a retro HUD."

5. **Combat Slash & Interactive Obelisks**

"Add a fluid crescent sword slash attack. Place dormant obelisks around the map that react and awaken when struck, plus an in-game achievement popup."

6. **Themes & Live Video Wallpapers**

"Add theme options in System Config: Dorfic (orange/white), Frutiger Aero, Liquid Metal, and Vaporwave with looping live video backgrounds."

7. **Performance Optimization**

"Fix game lag by pausing the background video while playing the game, and remove heavy CSS backdrop blur and CRT blend mode filters."

8. **UI Zoom & Responsiveness**

"Add a UI zoom scale option (100% to 175%) in settings and enlarge base typography so cards and text are easy to read without overflowing."

9. **Bug Fixes & Final Polish**

"Fix the Comms popup so tags don't get squashed, support ESC key to close modals, and resolve the TDZ ReferenceError preventing initial load."
